NUXATED IRON
Helps make red blood
and revitalizes nerves

WEAK NERVES AND THIN BLOOD

RUN HEALTH OF THOUSANDS WITHOUT
THEIR EVER SUSPECTING THE REAL
CAUSE OF THEIR TROUBLE—
IRON STARVATION

An enormous number of people who ought to be strong, vigorous and in the prime of life are constantly complaining of weak nerves, disturbed digestion, shortness of breath, palpitation of the heart, a general "run-down" condition, blood, bad memory, etc., all as a result of iron starvation of the blood. There are 10,000,000,000,000 red blood corpuscles in your blood and each must have iron. Without iron your blood also loses its power to change food into living cells and tissue, and nothing you eat does you the proper amount of good—you do not get the full strength out of it and as a consequence you become greatly weakened both in body and mind.

If you are not strong or well you owe it to yourself to make the following test: See how long you can walk or how far you can walk with out becoming tired. Next take two five-grain tablets of Nuxated Iron three times per day after meals for two weeks. Then test your strength again and see how much you have gained.

Over 4,000,000 people annually are using Nuxated Iron. It will not injure the teeth nor disturb the stomach, because it is organic iron like the iron in your blood and like iron in spinach, lentils, and apples and not metallic iron which people usually take. Your money will be refunded by the manufacturers if you do not obtain satisfactory results. Beware of substitutes. Look for the word "Nuxated" on every package and the letters N. I. on every tablet. Sold by all druggists.

Don't Spoil a Good Meal With a Bad Stomach

It is really a pitiful sight to see so many thousands of people worrying about what they can eat and what they can't eat.

Dyspeptics, they call themselves, but they stretch the imagination when they do it.

All these people need to make them healthy, cheerful and of sound appetite is a box of Mi-O-Na Tablets. The stomach of a dyspeptic is overworked and run down. It needs help to digest the food, but more than that it needs a prescription that will cleanse, renovate, strengthen and put elasticity into the stomach walls.

Mi-O-Na is the prescription that will do this and do it so promptly that you'll wonder why you didn't try it before.

It stops belching of gas and distress after eating in five minutes. It is undoubtedly the greatest stomach tonic ever given to the public by a specialist in stomach diseases. People's Drug Stores and leading druggists everywhere sell Mi-O-Na on the money back plan.

HYOMEL

Ends Catarrh or money back. Just breathe it in. Outfit includes inhaler. Extra bottles at all druggists.

REPORT OF MUTINY GIVEN BY CAPTAIN

Master of Polar Bear Tells of Gun Fights—Engineer Is Stabbed to Death.

NEW YORK, March 8.—United States District Attorney Leroy Ross, of Brooklyn, acting on information contained in an anonymous letter, summoned Capt. George Lund and Chief Officer Gus Atkinson, of the steamship Polar Bear, now lying in the Basin, to appear at his office and explain why certain items of the cargo, including a motorboat, a quantity of skins and a consignment of drugs, were not placed on the manifest. The Polar Bear arrived from Hamburg last week.

The two officers told a story of a six month's voyage that sounds like old-time deep-sea fiction—a tale of mutiny, murder, gun fights on board and controversies in port. Captain Lund claims the entry of the items if dispute was deliberately omitted from the manifest by a member of the crew for the purpose of getting the officers in trouble.

The Polar Bear, a 2,600-ton Shipping Board vessel, left Norfolk early in September, bound for St. Thomas, Buenos Aires, Hamburg and New York. Nearly all the 44 members of the crew were Spaniards. Trouble started on the first day out.

Captain Lund and Chief Officer Atkinson are officers of the old school. They did not temporize with troublemakers in the crew. Disaffection spread, and when St. Thomas was reached, a mutiny broke out.

Late one night, while the ship was lying at anchor, about twenty members of the crew, armed with knives, clubs and monkey wrenches, made a concerted attack on the quarters of Captain Lund and Atkinson. The officers were armed with revolvers, and stood off the attack.

Two members of the engine-room crew, William Doherty and William Donohue, attempted to go to the assistance of the captain and chief officer. Doherty was stabbed to death and Donohue was severely injured, losing an eye.

Jesus Gonzales and Jose Fonseca, firemen, jumped overboard and swam ashore. They were captured later by United States Marines, tried, found guilty of murder and hanged. At Buenos Aires most of the old crew deserted.

KNIGHTS OF COLUMBUS TO AID IRISH CAMPAIGN

District Organization Announces It Will Lend Co-operation.

The Knights of Columbus will lend their support to the campaign to be conducted by the American Committee for Relief of Ireland, according to an announcement of State Deputy Maurice J. McAuliffe. The announcement followed the request of Supreme Knight James A. Flaherty that all councils of the Knights of Columbus co-operate with the American Committee.

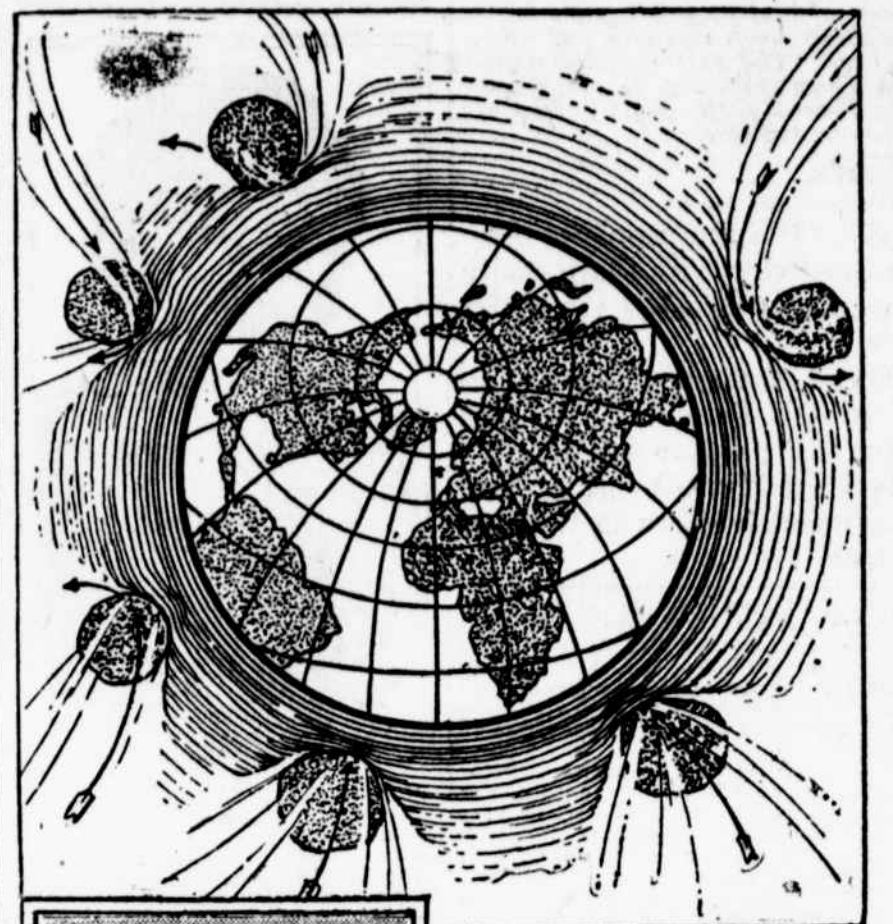

Andrew I. Hickey, chairman of the organization committee in charge of the campaign, stated today that twenty-one of the Washington districts will be ready to start work at the opening of the drive, March 17. Each district has five officers and twenty workers.

Killed Collecting Bill.
MIDDLETON, N. Y., March 8.—Horace Morehouse, eighty-four, a retired business man, is dead here of injuries sustained while endeavoring to collect a small bill at a home in this city. Saturday afternoon he was found in an alley dying from severe wounds on the head.

The authorities have placed one man under arrest. It is suspected that the aged man was pushed or thrown from a house.

Shoots Family; Ends Life.
WORCESTER, Mass., March 8.—Moses Boyauian, fifty, absent from home about nine months and from whom his wife was granted a divorce about a month ago, returned unexpectedly yesterday. According to the police, he attacked his wife and two sons with a revolver and stiletto, then fired a shot into his own head. All were taken to a hospital. Boyauian died last night.

Atmosphere of Earth Absorbs Shocks From Millions of Meteors

Atmosphere is a perfect shock absorber and meteor "stones" in planet's pathway are passed over without a jar or jolt—tremendous horsepower from sun.

SOME INTERESTING FACTS BY ASTRONOMER CAMPBELL

If the sun's energy were cut off from the earth for one month the Tropics would attain a state of frigidity.

It is estimated that at mid-day in the summer solar energy to the extent of 1,000,000 horsepower falls on every 250-acre tract of land in the torrid or temperate zone.

A knowledge of the origin of the sun's heat may provide the key for locking up great quantities of it in summer for use in winter.

The earth encounters tens of millions of meteoric bodies every twenty-four hours, the atmosphere of the earth acting as a cushion and preventing a continuous bombardment that would make life intolerable on earth without the protection of the atmosphere.

Falling meteoric matter tends to increase the size of the earth.

lower levels that is controlled by man and transformed into electric power for his own purposes. Those who ride on the street cars of our Western cities and read their newspapers at night are indebted for their motion and for their illumination to the sun's beneficent rays.

TREMENDOUS SOLAR ENERGY.
The earth's share of the solar energy, expressed in horsepower, is too great to set down in figures. If you should have to own 250 acres of land in the torrid or temperate zone you would be interested to know that your quota of the solar energy near the middle of a summer day is falling upon your tract of land at the rate of about 1,000 horsepower—more than enough heat and power to supply all the needs of one of the largest Pacific Coast cities.

This is but two-thirds of the sun's good intentions toward you, for some 40 per cent of the solar energy is intercepted by the atmosphere overlying your farm, and turned forthwith to outer space. Your neighbor's tract of 250 acres is also receiving solar energy near noon of his summer day at the rate of one million horsepower.

A great problem ahead of the scientific world is the storage of the sun's heat rays for release as needed. Astronomers are seeking intently for the sources of the sun's outpouring of energy; how can the sun maintain the supply for tens of millions of years as it undoubtedly is doing? One important source has been found—the sun's own gravitation, which tries constantly to pull every particle of its material to the sun's center—but another and possibly greater source seems to await discovery. A knowledge of the origin of the sun's heat may be the key for locking up great quantities of it on summer days and unlocking it when and where needed.

Stupendous numbers of meteors exist in interstellar space. Their number, even in our own solar system, is incomprehensible. These meteors are solid bodies varying in size from mere grains of dust up to others many feet in diameter and weighing tons. The earth, in its annual revolution around the sun, encounters tens of millions of these meteoric bodies every twenty-four hours. The atmosphere of the earth acts as a cushion to break the fall of these bodies, and to consume nearly all of them before they reach the earth's surface. Rushing through the upper strata of the atmosphere with speed sometimes reaching forty miles per second, their friction with the atmosphere heats them almost instantly to the burning and consuming point. We sometimes see the results of the combustion in the form of "shooting stars." Animal life on the earth would be intolerable except for the protection which the atmosphere affords.

The sun, with its entire planetary system, is moving through the great stellar system at the rate of four hundred million miles per year. The other millions of suns in our stellar system are also in motion and a study of their motions and distances is prominent in the astronomical life of the day.

Cranford Verdict Upheld.
Justice Stafford, in the Court of Appeals, has affirmed the verdict of a lower court awarding \$18,000 to the Cranford company in its suit against the District of Columbia for alleged breach of contract for street repair work.

OUCH! ANOTHER RHEUMATIC TWINGE

Get Busy and Relieve Those Pains With That Handy Bottle of Sloan's Liniment.

WHAT Sloan's does, it does thoroughly—penetrates without rubbing to the afflicted part and promptly relieves most kinds of external pains and aches. You'll find it clean and non-staining. Keep it handy for sciatica, lumbago, neuralgia, over-exertion, muscle, stiff joints, backache, pains, bruises, strains, sprains, bad weather after-effects.

For 30 years Sloan's Liniment has helped thousands the world over. You aren't likely to be an exception. It certainly does produce results.

All druggists—35c, 70c, \$1.40.

STUDENTS CHIP IN TO BUY AGED AUTO

Three Girls and Three Boys to Run Car on Co-operative Plan.

BALTIMORE, March 8.—A co-operative automobile, to be jointly owned, driven and enjoyed by three Hopkins students and three Goucher girls is the latest thing at the two North Baltimore institutions. The machine will be purchased today.

The idea was born in the Kappa Alpha Fraternity House, when King McCubbin announced that he would sell his machine—vintage 1913—for \$50.

A sort of co-constitutional corporation was formed, with a capital of \$75—\$12.50 each from the students. After the purchase \$25 will remain for repairs and expenses. After that is gone, the agreement states that each of the six shall contribute 50 cents a week.

The machine is the sort that broke all records back in the year it was made. In recent years many things besides records have been broken. Still, McCubbin insists that it will run. He is giving a guarantee that it will run at least one day and that the tires will last until the middle of the summer, especially if the car isn't run.

The "bus" is to be painted black and blue on one side—representing Hopkins—and blue and gold on the other, for Goucher. It is a narrow, four-seated affair, and there are six persons to ride. But it is springtime, and all six are young, so, when the machine runs, all hands probably will be on board.

Miners' Wages Cut.

BERKELEY SPRINGS, W. Va., March 8.—The white sand mines here which refine sand for glassmaking purposes have made another cut in wages. The cut varies in the several mines. One mine has done away with the usual bonus, and in money the reductions run from 50 cents to \$1.25 a day.

Teamster's Life Saved

Writes Letter That Is Worth Reading Very Carefully

Peterson's Ointment Co., Inc., Buffalo, N. Y.: "I was afflicted with a very severe sore on my leg for years. I am a teamster, and tried all medicines and surgery, but without success. I tried doctors, but they failed to cure me. I couldn't sleep for many nights from pain. Doctors said I could not live for more than two years. Finally Peterson's Ointment was recommended to me and by its use the sore was entirely healed. Thankful yours, William Hease, West Va. Peterson Ointment Co., Inc., Buffalo, N. Y. Petitioner says: 'I am proud of the above letter and have hundreds of others that tell of wonderful cures of Eczema, Piles and Skin Diseases.' Peterson's Ointment is 35 cents a large box at all druggists, and there isn't a broad-minded druggist in America that won't praise it. Mail orders filled by Peterson Ointment Co., Inc., Buffalo, N. Y. Petitioner's Drug Stores and O'Donnell's Drug Stores, Inc., will supply you."

JUDGE WOULD MAKE DRY VOTERS SETTLE

Cost of Enforcing Prohibition Should Be Borne by Them, He Believes.

BOSTON, March 8.—Judge Charles M. Bruce, of the Malden court, has a rather novel plan for solving the prohibition problem. He declares that there are practically the same number of persons arraigned in this court on charges of drunkenness today as when the saloons were wide open.

"Attempts to enforce prohibition are a farce," he says, "and are getting us nowhere. I think the following plan would reduce taxation and eliminate hypocrisy."

The several States of the Union should prepare a ballot giving the voter a chance to declare whether he is in favor of the Eighteenth Amendment and the enforcement of the Volstead act. These ballots to be sent to every registered voter after due publication in the press, and every voter not receiving one is to see that he gets one. They are to be signed with the voter's name and address and returned at a specified time and place. All unsigned ballots are to be marked "yes" and every voter failing to vote to be credited with a "yes."

"The 'yes' votes to be forwarded to the prohibition enforcement commissioner, who is to assess each yes voter his pro rata share annually of the cost of enforcing prohibition. This is a moral question and morals do not depend on property interests. Also it is based on the proposition 'Them that want pay'."

"Voters not paying such assessment after due notice to be jailed along with common bootleggers until such time as they do, in order that association with the bootleggers may tend to a speedy solution of the present problem."

Weak, Thin Folks Need Phosphate Says Dr. Kelle

Dr. Frederic S. Kelle, the New York author of medical text books, whose opinions are greatly valued, writes: "When the nerve tissue begins to lose its vitality, woman begins to lose her youth and vivaciousness. She becomes irritable, moody and despondent. It would be a kindness if more weak, thin, nervous men and women were aware of the efficacy of Bitro-Phosphate."

"Thousands of thin, run-down people whose nervous energy is nearly exhausted are turning to Bitro-Phosphate as dispensed by Peoples Drug Stores and other leading druggists, because it helps to re-vitalize the nerves, increase bodily weight and bring back energy and mental keenness."

CAUTION: Although Bitro-Phosphate is an excellent aid in relieving weak, nervous conditions, its use is not advised unless increased weight is desired.

Antique Furniture Sale at Sacrifice Prices

Antique Bureaus, Chests of Drawers, Secretary Desks, Grandfather Clocks, Lowboys, Console Tables, Antique Mahogany Chairs and Rockers, Hall Seat and Mirror, and other pieces of furniture.

Sale Starts Monday, March 7
The Boston Antique Furniture and Repair Co.

Never mind how often you have tried and failed, you can stop itching eczema quickly by applying Zemo furnished by any druggist for 35c. Extra large bottle, \$1.00. Healing begins the moment Zemo is applied. In a short time usually every trace of eczema, tetter, pimples, rash, blackheads and similar skin diseases will be removed.

For clearing the skin and making it vigorous and healthy, always use Zemo, the penetrating, antiseptic liquid. It is not a greasy salve and it does not stain. When others fail it is the one dependable treatment for skin troubles of all kinds.

In skin troubles, ordinary soaps are irritating and liable to aggravate the condition. Use Zemo soap. It is antiseptic, soothing, and hastens the process of healing.

The E. W. Rose Co., Cleveland, O.

Spring Is The Time To "Clean House" Body

In the springtime a great many people find themselves below normal health. The body, weakened by the processes of repair, cannot efficiently "clean house" bodily.

In such cases a food medicine and not a drug medicine is safest and best. Father John's Medicine is a real food medicine. It helps to make richer, more active blood. It invigorates and makes more active the tired, run-down body cells. This natural food medicine is quickly taken up by the digestive organs and supplies nourishment that is needed by the blood and the nervous system. It is the ideal food tonic to take in the springtime.

STOP ITCHING ECZEMA

Penetrating, Antiseptic Zemo Will Help You

Make Your Own Clothes With Ease

The Dressmaking Course of Six Lessons Will Teach You How—Come in and See

Spring and summer is the time of the year when every woman and child requires a great many fresh and attractive dresses and other clothes. If you knew how to make them yourself doubtless your wardrobe would be considerably less expensive to you.

The Woodward & Lothrop Dressmaking Course is planned so that even the amateur can successfully take advantage of it and learn the real fundamentals and the real practical points of dressmaking.

This course is under the personal instruction and individual attention of a thorough New York dressmaker, who will show you how to make your apparel look smart and distinctive and give you just the help your particular case requires. The work moves along with speed and accuracy, and all the time you are gaining in knowledge, accomplishing something worth while on your garment and becoming more and more confident of your ability.

Classes are now being formed. Come to the Dressmaking School Desk, Auditorium, Eighth floor, and make your application. You can get an hour to suit your convenience. Five different classes each day.

Take F Street Elevators to Eighth Floor.
